

Compliance Cloud vs Enterprise Cloud

FormAssembly offers two subscription options for our web form solution, specifically made for large organizations with complex processes and a need for increased security. Can't decide if Enterprise Cloud or Compliance Cloud plan is more fitting for your business? Here are facts:

COMPLIANCE

Starts at: 3 Users
Pricing: Contact Sales team for more info

Includes all features of the Enterprise plan and more.*

★ Best for: Organizations with a need for security and in highly regulated industries, such as healthcare, FinServe, government.

- ✓ **High availability with a 99.9% SLA** - Reliable uptime to allow you to drive business without interruption.
- ✓ **HIPAA Business Associate Agreement** - Further protect your organization and your data with a business associate agreement.

- ✓ **Encryption at rest** - Encryption at rest and in transit. This enhanced security allows you to meet legal compliance requirements.

- ✓ **HIPAA Compliance/ PCI DSS Level 1 Certification** - Securely collect & transfer PHI (protected health information) and payment card information.
- ✓ **Transparent practices** - Our security documentation is available for all to see.
- ✓ **Third-party security audit** - Our security certifications and compliance is tested and proved.
- ✓ **Continuous security improvement** - Security standards will change, and we hold a commitment to changing as well.
- ✓ **Multiple Industries** - Fits security needs of healthcare organizations, financial institutions, and governments.
- ✓ **Server Security** - Utilizing US-based IBM servers to ensure highest level of security, privacy, and compliance.

* Us-based servers

ENTERPRISE

Starts at: 3 Users
Pricing: \$599/month (paid annually)

★ Best for: Large organizations with complex processes, busy IT teams, and a need to ensure data governance.

- ✓ **Top-of-the-Line Server Technology** - We use industry-leading IaaS as our cloud providers.
- ✓ **Global Reach** - We have servers available in 16 countries, spanning five continents, allowing us to meet customer needs for the location of their data storage and collection.
- ✓ **Data Retention Customization** - Choose how long you want your data to be available in the FormAssembly servers as well as when it's purged.

- ✓ **Salesforce Connector** - Pre-populate information into forms with the Salesforce Prefill Connector, create and update Salesforce records automatically with the Salesforce Submit Connector.
- ✓ **Authentication and 20 connectors including SAML/LDAP** - Restrict access to specific users with respondent authentication options. Connect to payment processors, including Stripe, PayPal, and Chargent.

- ✓ **Form and User Management** - Manage users and set passwords, usernames, authentication types, and roles. Maintain admin control over forms and form branding and moderate forms as needed.

- ✓ **Single-Tenant Hosting** - A dedicated software instance for your Enterprise to maximize privacy and reliability.

Compliance Cloud Users Include:

-Eli Lilly
-HR Block
-Biogen
-Pueblo County Colorado

Enterprise Users Include:

-Amazon
-University of Michigan
-ReachLocal

What Compliance Cloud Users Are Saying

“ The ability for data to automatically enter the system and to have as little hands as possible touching it and have it go to the appropriate fields--that's helping us on manpower. Having FormAssembly be able to automatically populate information into Salesforce for us has been very beneficial.

—ROSALIND SHAFFER, ELI LILLY

What Enterprise Users Are Saying

“ We have institutional access to Google Forms, we have access to Qualtrics, but none of these are flexible enough to meet the number of use cases we put it these tools. FormAssembly in that regard is pretty dynamic given that we can do some major building and automating of processes.

—ADAM SKOCZYLAS, PROGRAM MANAGER,
UNIVERSITY OF MICHIGAN'S CENTER FOR
EDUCATIONAL OUTREACH
